

Government of India  
Ministry of Environment, Forest and Climate Change  
(Issued by the State Environment Impact Assessment  
Authority(SEIAA), Madhya Pradesh)

To,

The Associate Vice President

ADANI LOGISTICS LTD

Adani Logistic Ltd, Adani Corporate House, Shantigram Near Vaishno  
Devi Circle, S.G. Highway, Khodiyar, Ahmedabad 382421, Gujarat, India -  
382421

**Subject:** Grant of Environmental Clearance (EC) to the proposed Project Activity  
under the provision of EIA Notification 2006-regarding

Sir/Madam,

This is in reference to your application for Environmental Clearance (EC)  
in respect of project submitted to the SEIAA vide proposal number  
SIA/MP/MIS/254366/2022 dated 24 Mar 2022. The particulars of the environmental  
clearance granted to the project are as below.

- |   |   |
|---|---|
| 1. EC Identification No.                      | EC22B038MP126872  |
| 2. File No.                                   | 9086/2022   |
| 3. Project Type                               | New   |
| 4. Category                                   | B2  |
| 5. Project/Activity including<br>Schedule No. | 8(a) Building and Construction projects   |
| 6. Name of Project                            | Warehouse Project at Village Bhenslay,<br>Tehsil- Mhow, District- Indore, Madhya<br>Pradesh |
| 7. Name of Company/Organization               | ADANI LOGISTICS LTD   |
| 8. Location of Project                        | Madhya Pradesh  |
| 9. TOR Date                                   | N/A   |

The project details along with terms and conditions are appended herewith from page  
no 2 onwards.

Date: 29/04/2022

(e-signed)  
Shriman Shukla  
Member Secretary  
SEIAA - (Madhya Pradesh)

*Note: A valid environmental clearance shall be one that has EC identification  
number & E-Sign generated from PARIVESH. Please quote identification  
number in all future correspondence.*

*This is a computer generated cover page.*

PARIVESH

(Pro-Active and Responsive Facilitation by Interactive,  
and Virtuous Environmental Single-Window Hub)

**Ref: Proposal No. SIA/MP/MIS/254366/2022, Case No 9086/2022:** Prior Environment Clearance for Construction of Warehouse at Survey No. 37/2, Village - Bhenslay, Tehsil - Mhow, Dist. Indore, MP. Plot Area – 53,774 sqm with built up area – 32,566.97 sq.m by M/s Adani Logistic Ltd, Adani Corporate House, Shantigram Near Vaishno Devi Circle, S.G. Highway, Khodiyar, Ahmedabad, Gujrat. – 382421 Email: [env.allindore@gmail.com](mailto:env.allindore@gmail.com) Env. Consultant: M/s. Grass Roots Research & Creation India (P) Ltd., Ghaziabad, U.P.

With reference to above the proposal has been appraised as per prescribed procedure & provisions under the EIA notification issued by the Ministry of Environment & Forests vide S.O. 1533 (E), dated 14<sup>th</sup> September 2006 and its amendment, on the basis of the mandatory documents enclosed with the application viz., Form I, Form IA, Conceptual Plan, drawings and subsequently submission of EMP report, PPT & the additional clarifications furnished in response to the observations of the State Expert Appraisal Committee (SEAC) and State Environment Impact Assessment Authority (SEIAA) constituted by the competent Authority.

- i. Adani Logistics Limited have proposed to develop Warehouse/Logistic Park at Survey Nos. - 36/min-1(S), 37/1(S), 37/2(S), 38/1(S), 55/1(S), 55/2/min-1(S), 55/5/2/min-1/2(S), 55/3/min-1(S), 55/4/min-1(S), 55/5/1(S), 55/5/2/min-1/1(S) Village – Bhenslay, Tehsil – Mhow, District – Indore, Madhya Pradesh .
- ii. The proposed Warehouse/logistic park buildings will be leased out to various clients who undertakes activities viz: viz: Light & Heavy Engineering, Assembling, Manufacturing & Storage of Agro and non-agro products related to food & beverage industry, Textile products, Apparel, Leather and related products Tobacco products, Furniture, fittings & Artifact Products, Glass and related products; Wood and products of wood and cork including furniture, articles of straw and plated materials, Paper and paper products, Printing and reproduction of recorded media, Paints and chemicals within threshold limits, FMCG, Pharmaceuticals, Medicinal, Chemical and Botanical products, Rubber, Plastics and allied products, other non-metallic products, Basic metals, Fabricated metal products, including machinery and equipment, Computer, Electronic and optical products, Electrical equipment's and Electronic products, Industrial machinery and equipments; Automobiles products, Ancillaries and allied products; Defense & Aerospace Industries, Construction equipment and materials.
- iii. The total built up area proposed by PP is 32,566.97 sq.m. The project comes under 8 (a) category (B) of schedule of EIA Notification, 2006 because total construction is between 20,000 sqmt.& 1,50,000 sqmt. and plot area is less than 50 ha.
- iv. The case was considered in 563<sup>rd</sup> SEAC meeting dated 04.04.22 and recommended for EC.

v. **Summary of the project:**

Sr.No.	Item	Details
1.	Name & Location of the project	Development of Warehouse/ Logistic Park at Survey Nos. - 36/min-1(S), 37/1(S), 37/2(S), 38/1(S), 55/1(S), 55/2/min-1(S), 55/5/2/min-1/2(S), 55/3/min-1(S), 55/4/min-1(S), 55/5/1(S), 55/5/2/min-1/1(S) Village – Bhenslay, Tehsil – Mhow, District – Indore, Madhya Pradesh .
2.	Geological Location	22°37'12.90"N and 75°43'58.07"E.
3.	Connectivity of the site	National Highway- 52 is 0.4 km towards S to the project site, NH-47 is approx. 6.5 km towards NNW and SH-1 is approx. 10.3 km towards S. The nearest railway station is Tihi Railway Station which is approx. 20 m away from

		site boundary. Devi Ahilyabai Holkar Airport – 11.0 km (NE) direction of the project site.
4	Project Area	Total Site Area 53,774.00., Total Built-Up Area - 32,566.97 sq.m
5	Height of buildings	15.5 M
6	<b>Environment Impact and Its Mangement</b>	
	Water Requirement & Source	The total water requirement will be approx. 98 KLD out of which domestic water requirement is 45 KLD. The freshwater demand will be approx. 30 KLD. The source of water supply will be groundwater for which CGWA process is under progress.
7	Total Sewage Waste Water Generation & Effluent utilization	Total waste water generation : 39 KLD The Sewage treatment will be done in the MBBR technology based STP of capacity 50 KLD. Total treated water The treated effluent will be reused for flushing, & horticulture.
8	Rainwater harvesting	Total of 8 Rainwater Harvesting pits are proposed for artificial ground water recharge.
9	Air pollution control	Impact- Emissions of SPM, SO <sub>2</sub> , NO <sub>2</sub> and CO DG sets would be used as power back-up To mitigate the impacts of pollutants from DG set and vehicular traffic during the operational phase of the project, following measures are recommended for implementation: DG set emission control measures– Vehicular emission controls and alternatives–
10	Solid Waste Generation	Solid waste generated from the project shall be approx. 309 kg per day. Solid waste management during the operation stage shall be carried out through Organic Waste Convertor (OWC) for the biodegradable waste and government approved vendors for the dry waste.
11	Energy Requirements & Saving	The total power requirement will be 440 KW which will be met by Madhya Pradesh Paschim Kshetra Vidyut Vitran Company Ltd. DG set of 125 KVA will be installed as stand-by arrangements. For energy conservation Automatic rescue device in elevator will be provided. <ul style="list-style-type: none"> <li>• All external &amp; internal lighting shall be BEE star rated.</li> <li>• All common spaces including street lights (where there is no use of light for reading– purposes), shall be of "LED".</li> <li>• Astronomical timer based controllers will be used for automatic dusk to dawn– operation of street lights.</li> <li>• Integration of automated system to operate electrical equipment as per load– requirement to save energy.</li> </ul>
12	Parking	Total 592 nos. of parking including 319 (Car) + 250 (2-Wheeler) + 23 (Truck) are proposed. For smooth movement of traffic internal roads of 9.0 m and 6.0 m (peripheral) are proposed.
13	Proposed Green Area	Total green area measures 17745.5sqm i.e. 33% of the plot area. Native, species will be planted inside the premises.
14	Fire Fighting Measures	<ul style="list-style-type: none"> <li>• Firefighting measures will be adopted as per the guidelines of NBC. External yard hydrants will be installed around all buildings in the complex in RCC Pump house cabinet</li> <li>• Fire hydrant system will be provided within the buildings, fire escape staircases and refuge areas will be provided and the building structures will be planned as per NBC, 2016. In addition, 6 kg fire extinguishers will be provided for class A, B, and C fires. CO<sub>2</sub></li> </ul>

		extinguishers (4.5Kg) will also be provided.
15	Project Cost	The total Cost (Land + Development) of the proposed project will be INR 101.67 Crore.
16	<b>Proposed CER Budget And Activity</b>	PP has proposed Rs 05.00 Lakhs as Corporate Environment Responsibility (CER) for habitat development in in Ralamanadal sanctuary, Indore, which shall be implemented within one year.
17	EMP cost of the project	PP has proposed Rs. 113.0 Lakhs as capital and Rs. 08. Lakhs as recurring cost for this project.

Based on the information submitted at Para i to v above and others, the State Level Environment Impact Assessment Authority (SEIAA) considered the case in its 718<sup>rd</sup> meeting held on 12.04.2022 and decided to accept the recommendations of 663<sup>rd</sup> SEAC meeting held on dated 04.04.2022.

Hence, Prior Environmental Clearance is accorded under the provisions of EIA Notification dtd. 14<sup>th</sup> September 2006 & its amendments to the proposed Construction of Warehouse at Survey No. 37/2, Village - Bhenslay, Tehsil - Mhow, Dist. Indore, MP. Plot Area – 53,774 sqm with built up area – 32,566. 97 sq.m by M/s Adani Logistic Ltd, Adani Corporate House, Shantigram Near Vaishno Devi Circle, S.G. Highway, Khodiyar, Ahmedabad, Gujrat. – 382421 subject to the compliance of the Standard Conditions and the following additional Specific Conditions as recommended by SEIAA & SEAC in its meetings.

**A. Specific Conditions as recommended by SEIAA**

1. PP should ensure to water supply arrangement through ground water after obtaining permission from Central Ground water Board.
2. The inlet and outlet point of natural drain system should be maintained with adequate size of channel for ensuring unrestricted flow of water.
3. **Disposal of waste water.**
  - a. Sewage shall be treated in the STP based on MBBR Technology with tertiary treatment i.e. Ultra Filtration. The Treated effluent from STP shall be recycled /reused for flushing, DG cooling, Gardening and HVAC.
  - b. PP should ensure linkage with municipal sewer line for disposal of extra treated waste water and obtain NOC for the same from concerned department.
4. **Solid Waste Management:**
  - a. Separate wet and dry bins must be provided at the ground level for facilitating segregation of waste.
  - b. The solid waste generated should be properly collected and segregated. Wet garbage should be composted and dry inert solid waste should be disposed off to the approved sites for land filling after recovering recyclable material.
  - c. Wet Garbage shall be composted in Organic waste convertor. Adequate area shall be provided for solid waste management within the premises which will include area for segregation, composting. The Inert waste from the project will be sent to dumping site.
  - d. Ensure linkage with Municipal Corporation for final disposal of MSW and obtain NOC from the Municipal Corporation Indore for the same.
5. PP should ensure road width, front MOS and side / rear as per MPBVR 2012.

**6. For firefighting:-**

- a. PP should ensure distance of fire station approachable from the project site.
- b. As per MPBVR, 2012 rule 42 (3) PP should submit necessary drawings and details to the Authority (Nagar Nigam, Indore) incorporating all the fire fighting measures recommended in National Building Code part – IV point no. 3.4.6.1. The occupancy permit shall be issued by Nagar Nigam only after ensuring that all fire fighting measures are physically in place.

**7. For Rain Water Harvesting, and Ground water recharge:-**

- a. PP should ensure the rain water harvesting with **08 no.** of recharging pits and these pits should be connected laterally to consume the surplus runoff. In addition, PP should provide recharging trenches. The base of the trenches should be Kachha with pebbles.
- b. The storm water from roof – top, paved surfaces and landscaped surfaces should be properly channelized to the rain water harvesting sumps through efficient storm water network as proposed. The budget should be included in EMP plan for storm water management.
- c. Additional soil for leveling of the proposed site should be generated within the sites (to the extent possible) so that natural drainage system of the area is protected and improved

8. PP should ensure to provide total- 592 nos. of parking including 319 (Car) + 250 (2-Wheeler) + 23 (Truck) and explore the possibility to increase the parking space. No other activities will be allowed in the parking area.

**9. For Energy Conservation PP should Ensure :-**

- a. Solar lights should be provided for common amenities like Street lighting & Garden lighting.
- b. PP should ensure installation of photovoltaic cells (solar energy) for lighting in common areas, LED light fixtures, and other energy efficient equipments.
- c. electrical charging points for E-Vehicles shall be provided to promote clean energy

**10. Green belt :-**

- a. PP should ensure plantation in an area of 17745.5 m<sup>2</sup> (33 % of total plot area) by planting 3000 nos of trees at site along the road, around open space area, parking area and other amenities. Trees of indigenous local varieties like Neem, Peepal, Kadam, Karanj, Kachnaar, Saltree, Gulmoharetc.should be planted.
- b. The green belt of the adequate width and density preferably with local species along the periphery of the plot shall be raised so as to provide protection against particulates and noise.

11. The project proponent shall comply with the provisions contained in this Ministry's OM vide F.No. 22-65/2017-IA.III dated: 1st May 2018, as applicable, regarding Corporate Environment Responsibility. The specific activities to be undertaken under CER to be carried out in consultation with District collector or village panchayat.

12. PP should ensure to submit half yearly compliance report with photographs of plantation in MP-SEIAA. If PP is failed to upload or submit two consecutive half yearly compliance reports of EC conditions to concerned authority (SEIAA and Regional Office, MoEF& CC, GoI, Bhopal) than prior environmental clearance issued to PP will automatically be treated as cancelled/ revoked as per OM No. 930/SEIAA/2019 dated 30.05.2019 issued by MPSEIAA.

## **B. Specific Conditions as recommended by SEAC**

### **I Statutory Compliance**

- i. The project proponent shall obtain all necessary clearance/permission from all relevant agencies including town planning authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.
- ii. The approval of the Competent Authority shall be obtained for structural safety of building due to earthquakes, adequacy of firefighting equipment etc as per National Building code including protection measures from lightning etc.
- iii. The project proponent shall obtain Consent to Establish/Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/Committee.
- iv. The project proponent shall obtain the necessary permission for drawl of ground water/surface water required for the project from the competent authority.
- v. A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.
- vi. All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities.
- vii. The provisions for the solid Waste (Management) Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste (Management) Rules, 2016 shall be followed.
- viii. The project proponent shall follow the ECBC/ECBC-R prescribed by Bureau of Energy Efficiency, Ministry of Power Strictly.
- ix. The project area shall be secure through boundary wall and excavated top soil shall not be used in filling of low lying area. The top soil shall be used for greenery development.

### **II. Air quality monitoring and preservation**

- i. Notification GSR 94(E) dated: 25/1/2018 MoEF& CC regarding Mandatory implementation of Dust Mitigation Measures for Construction and Demolition Activities for project requiring Environmental Clearance shall be complied with.
- ii. A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site.
- iii. The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released covering upwind and downwind directions during the construction period.
- iv. 01 Diesel power generating sets of capacity 125 kVA is proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of low Sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board.
- v. Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site. These measures shall include screens for the building under

construction, continuous dust/ wind breaking walls all around the site plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, Murram and other construction materials prone to causing dust polluting at the site as well as taking out debris from the site.

- vi. Sand, Murram, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution.
- vii. Wet jet shall be provided for grinding and stone cutting.
- viii. Unpaved surface and loose soil shall be adequately sprinkled with water to suppress dust.
- ix. All construction and demolition debris shall be stored at the site (are not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Rules, 2016.
- x. The diesel generator sets to be used during construction phase shall be low sulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards.
- xi. The gaseous emission from DG set ( 1x125 kVA) shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms.
- xii. For indoor air quality the ventilation provisions as per National Building Code of India.

### **III Water quality monitoring and preservation**

- i. The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water.
- ii. Warehouse/Logistic Park shall be designed to follow the natural topography as much as possible Minimum cutting and filling should be done.
- iii. Total water requirement in the summer season will be ~98 KLD out of which domestic (fresh (30KLD) + flushing (15KLD) water requirement is 45 KLD and horticulture water requirement is 53 KLD. Fresh water demand will be ~30 KLD. Wastewater Generation will be ~39 KLD.
- iv. No Wastewater will be discharge in the Sewer outside warehouse/logistic park premises. Surplus treated effluent during rainy season (if any) will be given to the nearby farmers/construction sites as a part of their daily water requirement.
- v. Recycled water system shall utilize this treated sullage and serve for non-contact uses such as flushing and horticulture.
- vi. Dual plumbing system that utilizes separate piping systems for freshwater and recycled sullage will be adopted for the project.
- vii. The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF & CC along with six monthly Monitoring reports.
- viii. A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed the quantity of water allotted to the project under consideration and the balance water

- available. This should be specified separately for ground water and surface water sources, ensuring that there is no impact on other users.
- ix. At least 11% of the open spaces as required by the local building bye-laws shall be previous: Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as previous surface.
  - x. Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc and other for supply of recycled water flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.
  - xi. Use of water saving devices/fixtures (Viz. low flow flushing systems; use of low flow faucets tap aerators etc) for water conservation shall be incorporated in the building plan.
  - xii. Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.
  - xiii. Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.
  - xiv. The local bye-law construction on rain water harvesting should be followed. If local by-law provision is not available, adequate provisions for storage and recharge should be followed as per the Ministry of Urban Development Model Building bylaws, 2016. Rain water harvesting recharge pits/storage tanks shall be provided for ground water recharging as per the CGWB norms.
  - xv. A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5,000 square meter of built up area and storage capacity of minimum one day of total fire water requirement shall be provided. In areas where ground water recharge is not feasible, the rain water should be harvested and stored for reuse.
  - xvi. The ground water shall not be withdrawn without approval from the Competent Authority.
  - xvii. For rainwater harvesting, 08 recharge pits will be constructed for harvesting rain water. The total recharge capacity of these pits about 1251.73 m<sup>3</sup>/hr. Mesh will be provided at the roof so that leaves or any other solid waste/debris will be prevented from entering the pit.
  - xviii. The RWH will be initially done only from the roof top. Runoff from green and other open areas will be done only after permission from CGWB.
  - xix. All recharge should be limited to shallow aquifer.
  - xx. No ground water shall be used during construction phase of the project.
  - xxi. Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering.
  - xxii. The quality of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The recorded shall be submitted to the Regional Office, MoEF & CC along with six monthly Monitoring report.
  - xxiii. Sewage shall be treated in the MBBR based STP (Capacity - 50 KLD). The treated effluent from STP shall be recycled/re-used for flushing. AC makes up water and gardening. As proposed, no treated water shall be disposed in to municipal drain.
  - xxiv. The waste water generated from the project shall be treated in STP of 50 KLD capacity (based on MBBR based technology) and then reused for various purposes. No water body or drainage channels are getting affected in the study area because of this project.
  - xxv. No sewage or untreated effluent water would be discharged through storm water drains.
  - xxvi. Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the odour problems from STP.
  - xxvii. Sludge from the onsite sewage treatment including septic tanks, shall be collected, conveyed and disposed as per the Ministry of Urban Development, Control Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.

#### IV Noise monitoring and prevention

- i. Ambient noise levels shall conform to residential area/commercial area/industrial area/silence zone both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitoring during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB/SPCB.
- ii. Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
- iii. Acoustic enclosures for DG sets, noise barriers for ground run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources.

#### V Energy Conservation measures

- i. Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency shall be ensured, Building in the State which have notified their own ECBC, shall comply with the State ECBC.
- ii. Outdoor and common area lighting shall be LED.
- iii. For this project total power requirement of project: 4635 KW out of this 500 Kw power produced by solar panels which is about 10.78 % of total power requirement.
- iv. Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof u-values shall be as per ECBC specifications.
- v. Energy Conservation measures like installation of CFLs/LED's for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning.
- vi. Solar, wind or other renewable energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level /local building bye-laws requirement, which is higher.
- vii. Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.
- viii. PP shall be explored the possibility of lying of solar panels on warehouse roofs to generate the green energy for their in -houses uses, their e- vehicles etc.

#### VI Waste Management

- i. During the operation phase, solid waste generated from the project shall be ~309 kg per day .
- ii. These all type of waste shall be treated/ disposed off as per provision made in the MSW Rules 2016.
- iii. A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the MSW generated from project shall be obtained.
- iv. Disposal of muck during construction phase shall not create any adverse effect on the neighboring communities and be disposed taking the necessary precautions for general

safety and health aspects of people, only in approved sites with the approval of competent authority.

- v. Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste (0.4 ton/day) shall be segregated into wet garbage and inert materials.
- vi. All non-biodegradable waste shall be handed over the authorized recyclers for which a written lie up must be done with the authorized recyclers.
- vii. Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.
- viii. Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction materials quantity. These include fly ash brick, hollow bricks, AACs, Fly Ash Lime Gypsum block, compressed earth blocks and other environmental friendly materials.
- ix. Fly ash should be used as building material in the construction as per the provisions of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016 Ready mixed concrete must be used in building construction.
- x. Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the construction and Demolition Rules, 2016.
- xi. Used CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/rules of the regulatory authority to avoid mercury contamination.

#### **VII Green Cover**

- i. Total 3000 trees shall be planted in the area of 17745.5 m<sup>2</sup> (33 % of total plot area) which is developed as greenbelt development.
- ii. Not tree can be felled/transplant unless exigencies demand. Where absolute necessary, tree felling shall be with prior permission from the concerned regulatory authority. Old trees should be retained based on girth and age regulations as may be prescribed by the Forest Department. Plantations to be ensured species (cut) to species (Planted).
- iii. A minimum of 1 tree for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should included plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping.
- iv. Where the trees need to be cut with prior permission from the concerned local Authority, Compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per the details provided in the project document.
- v. Topsoil should be stripped to depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stack plied appropriately in designated areas and reapplied during plantation of the proposed vegetations on site.
- vi. The surplus soil shall be used for plantation purposes.

## VIII Transport

- i. A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public and private network. Road should be designed with due consideration for environment and safety of users. The road system can be designed with these basic criteria.
  - a. Hierarchy of roads with proper segregation of vehicular and pedestrian traffic
  - b. Traffic calming measures.
  - c. Proper design of entry and exit points
  - d. Parking norms as per local regulation
