(1) EC was issued to PP Vide letter no. No.75/SEIAA/2017 dated 19.6.2017.

(2) Online application SIA/MP/IND/15632/2020 dtd.19.06.20 for amendment received in SEIAA office 23.06.20 PP has applied to amend specific condition number A-3 mentioning to conserve water of existing water pond (abandoned quarry) located inside the plant premises & that water shall not be taken from this water body for domestic and industrial purpose and has requested to allow drawls of water from the water body.

Further PP has submitted to fulfil water requirement of industrial purpose, Detailed Hydro geological study was conducted by PP to assess the water availability in pond (abandoned quarry) and found ground water level in and around plant premise is showing rising trend in water level. Non withdrawal of ground water for the project reflects positive impact on ground water regime of the area.

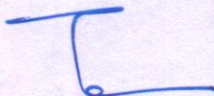

(3) PP has also submitted Hydrogeological study report of the project area and also submitted that he is having captive limestone mines adjoining the cement plant near villages Bhatkotri and Dhanora in Nimbahera, Chittorgarh, Rajasthan. Ministry of Environment and Forest & Climate Change, New Delhi is emphasizing all industrial units to reduce ground water withdrawal and to utilize surface water resources as far as possible. MOEF vide EC order No. J-11011/298/2012/IA-II(I) dated 4-10-2019 at Specific Condition no. 1 of his Integrated Cement Plant in Chittorgarh Rajasthan has prescribed to utilize surface water for integrated cement plant and to control withdrawal of ground water .

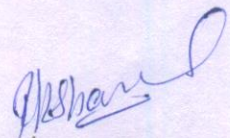

(4) The case was discussed in detail and recorded that :-

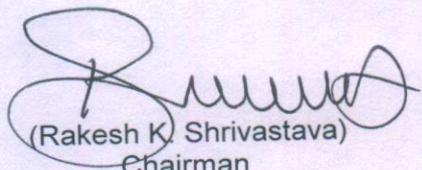

i. As per the hydro-geological study report the average annual rainfall in the region is 826 mm. The active storage capacity of the pond (abandoned quarry) is 110632.5 cum. Catchment of rainwater nallah is 496.4 ha which contributes flow to the pond (abandoned quarry).

- Average Yield from this catchment is 1.23 MCM (Million Cubic meter).
- The pond (abandoned quarry) gets direct rainfall volume of 0.012 MCM. from 1.4 ha of its surface area.
- Total water entering the pond (abandoned quarry): 1.242 MCM
- Evaporation loss in the pond (abandoned quarry) : 0.008 MCM
- The total annual industrial demand @ 245 cum/day (10 cum/day for domestic and 235 cum/day for industrial working purpose).

ii. During the study it was assessed that 235 cum/day water from the pond (abandoned quarry) can be withdrawn for industrial purpose for 300 plant working days.

- Total water to be drawn from pond (abandoned quarry) would be 70500 cum/year (0.0705 MCM).
  - The domestic demand 10 cum /day (3650 cum/year) will be met from groundwater.
  - If water from the pond (abandoned quarry) is utilized, it will reduce 235 cum/day (70500 cum /year) withdrawal from groundwater resources. An additional volume of groundwater 84804 cum/year will be from pond (abandoned quarry) water for recharge. Total increase in ground water resources to the surrounding area will be (70500+84804= 155304 cum/year) .
- iii. Total 12 nos Rain water harvesting structure constructed in the plant premise which recharge to the tune of 103249 cum/Year (0.103249 MCM).
- iv. Total increase in ground water resources  $70500+84804 + 103249 = 258533$  cum/year from all above mentioned measures.
- (5) The letter submitted by PP with supporting documents (hydro-geological study report) was examined and has **put emphasis on all industrial units to reduce groundwater withdrawal by using surface water resources is as far as possible** as per direction of **Ministry of Environment, Forest and Climate Change, Govt. of India. After detail discussion and deliberation**, it is decided to accept the request of PP and accordingly specific condition No. A-3 mentioned as ***“PP should develop and conserve the existing water body within the plant area with proper fencing, landscaping with plantation. Fountains shall be installed within the water body for aeration. No drawal of water shall be permitted from this water body for domestic and industrial purpose”*** in EC letter No. 75/SEIAA/ 2017 dated 19.06.17 is hereby a amended as below :

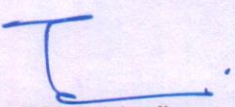

***“PP should develop and conserve the existing water body within the plant area with proper fencing, landscaping, plantation and installation of fountains within the water body for aeration. Drawl of water is permitted from this water body situated in plant area for domestic and industrial purpose to utilize surface water resources as far as possible and reduce ground water withdrawal.”***

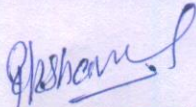

The amendment should be read along with the original EC issued to PP and all the conditions mentioned in the prior EC vide letter No. 75/SEIAA/2017 dated 19.06.17. shall remain the same. PP and all concerned informed accordingly.
