

1.0 Opening Remarks of the Chairman

The Chairman welcomed all the members of the Committee (**Annexure-1**) and thereafter agenda item taken up for deliberations. The list of participants present during meeting is annexed as **Annexure-2**.

2.0 Consideration of the Projects

Following issues were discussed and decided:-

- A. 13 proposals were invited for TOR / EIA deliberations. Out of these proposals only 11 proposals were presented before the committee.
- B. Next meeting was confirmed for 26th March 2009 as per the decision of 20th Meeting.

3.0 Deliberations:

1. 234/2008

Shri Jyoti Minerals Industries kamal Kumar Bagodia Station Road Katni (M.P)
Project: Limestone, Dolomite stone, laterite mine 6.00 Ha at village Ritual Tehsil - Bahoriband, Katni

The proposed case was submitted for approval / issue of TOR, but the proponent did not appear for the submission. The proponent has been non responsive continuously for the fourth time. It appears that Project Proponent is not interested to continue with the project hence committee decided to return the case to SEIAA.

2. 246/2008

**MINUTES OF 21st MEETING OF STATE EXPERT APPRAISAL
COMMITTEE HELD ON 25th March, 2009**

2

*Project: Darshini Laterite, Ochre and clay mine, Village - Darshini, Tesil- Sihore Distt.-
Jabalpur (M.P)*

This being a mining project with lease area between 50 ha to 5 ha is listed at S.N. 1(a) of schedule under 'B' Category of EIA Notification, 2006 and is to be appraised by SEAC.

The applicant, assigned by his consultant presented the salient features of the project and the draft Terms of Reference for undertaking detailed EIA study.

After detailed deliberations, the SEAC has recommended the inclusion of following TORS in the preparation of EIA/EMP:-

- Duly attested & certified Mining Plan approved by IBM has to be submitted along with the copy of current lease deed and lease letter issued by the State Mining Corporation.
- Monitoring has to taken up as per the norms using appropriate air/water quality modeling, based on meteorological data (wind-rose) of the region.
- Plantation in at least 33% of the total area has to be ensured; accordingly plan has to be submitted with EIA. [Plantation Scheme].
- Total area for which afforestation has been proposed – plan stating how much plantation shall be taken up yearly, has to be submitted. Plantation of local species along with Sheesham, Tendu, Kachnar & various fire-wood trees should be taken up.
- PFR should include cost benefit analyses considering- social cost, environment cost and pre-occupational cost.
- For welfare of the mine-workers various activities such as regular health checkups, first-aid, shelter for rest and meals, drinking water etc. has to be taken up. Nearby mine owners may form a society and funds for welfare of mine-workers may be created from various govt. schemes and other sources. This aspect has to be covered in the EMP.
- Management of OB solid waste generated during mining has to be addressed through incorporation of a concrete plan for the same.

- Water-shed management plan to be submitted, in view of the damages caused in the catchment-area of rivers falling in the prescribed study area of mining region & to support the ground-water recharging.
- In land use map, details regarding the agricultural crops pattern around the mining area should also be added.
- Map depictions: coloured maps depicting land use of the region showing sensitive / fragile features and detailed lay-out of the site clearly showing green-belt (existing & planned)
- Species proposed in the green belt development should be notified.
- Satellite Image of the location of mine should be submitted with demarcation of other proposed/in operation mines in nearby area.
- Location is also to be shown in Tehsil map procured from revenue department.
- The EIA should be prepared based on model TOR for appraisal of mining projects issued by MoEF, Delhi
- If required, NOC from the concerned DFO to be submitted.

3. 208/2008

Sh. Ramzan bhai, S/o Sh. Mohammad Ismil, barhi Raad, near Khirahni Fatak, Katni, Dist. katni

Project: Fire clay, Laterite, red ochre and red Oxide mine of Ramzan bhai. Village-Suddi, RIC Badwara, the. Badwara, Dist- Katni. Mining Lease Area 6.00 Ha. Prod. Cap. 4000 MT/month.

The proposed case was submitted for approval / issue of TOR. Project proponent appeared before the committee and has requested to consider the case in the next meeting as was not prepared for the deliberation; Committee accepted the request and decided to call the proponent in next meeting.

4. 215/2008

M/s Guru Kripa Stone cutting mines & mineral industries In front of Shabd Pratap Ashsram Rampuri Colony Behind Rajasthan Emporium

Project: Quarry lease deed 7.967 hect. at village Badagaon Gwalior (M.P).

After detailed deliberations, the SEAC has recommended the inclusion of following TORS in the preparation of EIA/EMP:-

1. EIA should cover the details of hazardous substances (raw materials) being used in the process in form an inventory mentioning their source (suppliers), on-site storage quantities, mode of storage, handling procedures, transportation mode to the site, safety measures to be adopted etc.
2. EIA should properly address all types of hazardous wastes expected from the industry including their source of generation, quantities, on-site storage facility, transportation to the disposal sites, mode of disposal and handling etc.
3. Quantity of water required for various uses (industrial, domestic etc.) and its source has to be furnished in the report along with the commitment letter/ permission from the authorities.
4. Map depictions: coloured maps depicting land use of the region showing sensitive / fragile features and detailed lay-out of the site clearly showing green-belt (existing & planned).
5. A detailed lay out of the site has to be furnished clearly showing the proposed green belt (at least 33%).
6. Total area for which afforestation has been proposed – plan stating how much plantation shall be taken up yearly, has to be submitted. Species proposed in the green belt development should be notified. Local and suitable species should be planted.
7. Environmental monitoring including air, surface-water, ground-water, noise and soil has to be carried out as per standard procedures. Interpretation of Results should be presented using standard models.
8. Detail drawing and design of Effluent Treatment Plant has to be furnished along with disposal of treated effluent. Lay out of the ETP showing the locations of peizometric holes should be mentioned clearly, to evaluate the effects on ground water quality.
9. Process-flow chart of each product, Material balance and Water balance sheet should be furnished with report.
10. Industry being highly water & air polluting the pollution control equipments proposed for installation should be dealt in detail.
11. The EIA report should be prepared using state of art techniques and accordingly the effective EMP should be furnished with the report.
