

1.0 Opening Remarks of the Chairman

The Chairman welcomed all the members of the Committee (**Annexure-1**) and thereafter agenda item taken up for deliberations. The list of participants present during meeting is annexed as **Annexure-2**.

2.0 Consideration of the Projects

Following issues were discussed and decided:-

- A. 12 proposals were invited for TOR / EIA deliberations. All of these proposals were presented before the committee. Query replies for 11 cases were also placed on board for reply based discussion and decision.
- B. Committee has authorized the Chairman for examining the query replies and the supporting documents prior to the meetings and if found appropriate the concerned cases may be referred to SEIAA for further action in the respective cases.
- C. Next meeting was decided for 20th and 21st April 2009.

3.0 Deliberations:

1. 264/2009

Shri Arvind Pratap Singh, Behind Hanuman Toria Chhatarpur (M.P)

Pyrophyllite & Diaspore Mine at Village- Nandgaikala, Tehsil- Chhatarpur Distt.- Chhatarpur (M.P) Area- 6.602 Ha, Cap- 10,000 MT/Year **TOR approval**

This being a mining project with lease area between 50 ha to 5 ha is listed at S.N. 1(a) of schedule under 'B' Category of EIA Notification, 2006 and is to be appraised by SEAC.

The applicant, assigned by his consultant presented the salient features of the project and the draft Terms of Reference for undertaking detailed EIA study.

**MINUTES OF 22nd MEETING OF STATE EXPERT APPRAISAL
COMMITTEE HELD ON 26th March, 2009**

2

After detailed deliberations, the SEAC has recommended the inclusion of following TORS in the preparation of EIA/EMP:-

- Duly attested & certified Mining Plan approved by IBM has to be submitted along with the copy of current lease deed and lease letter issued by the State Mining Corporation.
- Monitoring has to be taken up as per the norms using appropriate air/water quality modeling, based on meteorological data (wind-rose) of the region.
- Plantation in at least 33% of the total area has to be ensured; accordingly plan has to be submitted with EIA. [Plantation Scheme].
- Total area for which afforestation has been proposed – plan stating how much plantation shall be taken up yearly, has to be submitted. Plantation of local species along with Sheesham, Neem, Tendu, Kachnar & various fire-wood trees should be taken up.
- PFR should include cost benefit analyses considering- social cost, environment cost and pre-occupational cost.
- For welfare of the mine-workers various activities such as regular health checkups, first-aid, shelter for rest and meals, drinking water etc. has to be taken up. Nearby mine owners may form a society and funds for welfare of mine-workers may be created from various govt. schemes and other sources. This aspect has to be covered in the EMP.
- Management of OB solid waste generated during mining has to be addressed through incorporation of a concrete plan for the same.
- Water-shed management plan to be submitted, in view of the damages caused in the catchment-area of rivers falling in the prescribed study area of mining region & to support the ground-water recharging.
- In land use map, details regarding the agricultural crops pattern around the mining area should also be added.
- Map depictions: coloured maps depicting land use of the region showing sensitive / fragile features and detailed lay-out of the site clearly showing green-belt (existing & planned)
- Species proposed in the green belt development should be notified.
- Satellite Image of the location of mine should be submitted with demarcation of other proposed/in operation mines in nearby area.
- Location is also to be shown in Tehsil map procured from revenue department.
- The EIA should be prepared based on model TOR for appraisal of mining projects issued by MoEF, Delhi

13

This is a dissenting note for case no. 29/2008

M/s S.S. Enterprises 40, APR Society, Katanga Jabalpur (M.P)

Project: Mining lease area 33.44 Ha, Mining of iron, manganese, laterite & ochre at Jabalpur (M.P) Cap. - 7, 50,000 tonnes /annum EIA Presentation.

The Proponent has been sanctioned a mining lease for Iron, Manganese, Laterite and Ochre in Jabalpur District. Mining is a job of specialists. In this case four ores are proposed to be extracted. It is not necessary that the agency has specialization of mining and segregation for all four ores.

In discussions it was revealed that a mountainous land will be completely dug out and removed and will be converted into a 33 Ha big pond. In this way the complete topography will be changed and it seems that there will not be left any over-burden. It is not clear that where will the green belt be created and how 33% area will be taken up for plantations. This type of mining is going to change the complete topography of the site and subsequently going to affect the environment of the locality.

Mining of every product coming in way is not understandable. Had there been only one important ore mining resulting into a big pond the situation would be different and considerable.

I feel that in such mining cases where every product coming in way is proposed to be removed should not be granted 'environmental clearance'. It is not only case of this type and I have the same opinion for all such cases also.

EIA along with the Public Hearing proceedings was submitted by the proponent in compliance to the TOR issued vide letter no. 347 Dated 07/08/08. The applicant, assigned by his consultant presented the salient features of the project and the EIA / EMP study. Project Proponent has requested for the production capacity of marble 19,000 MT/Y instead of 10,000 MT/Y, Committee has refused the request of the PP at this point of time. The PP may apply separately for enhanced capacity.

After detailed deliberations, the Committee has raised following queries to be replied by the Proponent:-
