

1.0 Opening Remarks of the Chairman

The Chairman welcomed all the members of the Committee (**Annexure-1**) and thereafter agenda items were taken up for deliberations. The list of participants present during meeting is annexed as **Annexure-2**.

2.0 Consideration of the Projects

26 proposals (for TOR / EIA deliberations) were invited. Proponents / Representatives of all the proposals made their presence before the committee. It is decided to hold the 55th & 56th meetings on 24th & 25th of May 2010.

TOR Deliberations:

The sand quarries with lease area between 05 ha to 50 ha are covered under the provisions EIA Notification, 2006 as such projects are listed at S.N. 1(a) of the schedule under 'B' Category hence these are required to be appraised by SEAC. M.P. State Mining Corporation Ltd. is controlling the operations of following sand quarries and hence has applied for grant of prior EC for these projects.

1. **Case no. 518/2010** – In-charge Officer, M.P. State Mining Corporation Ltd. Area Hills Bhopal (M.P) Sand Mine 6.250 Ha at Village- Mahoba Chakra-3, Khasra No. 01, Tehsil- Palera, Distt. Tikamgarh (M.P) **For ToR**
2. **Case no. 519/2010** - In-charge Officer, M.P. State Mining Corporation Ltd. Area Hills Bhopal (M.P) Sand Mine 7.891 Ha at Village- Kubri, Khasra No. 34, Tehsil- Palera, Distt. Tikamgarh (M.P) **For ToR**

Harda (M.P)) For ToR

Officials from M.P. State Mining Corporation were present in the meeting but they failed to explain the salient features and locations of the quarries as they did not come prepared with appropriate presentations. Committee has issued following instructions / suggestions to the PP:

1. TORs' issued earlier during June 2009 for preparation of EIA / EMP other sand quarries of M.P. State Mining Corporation have not been responded yet. Committee asked the PP to submit the EIA reports for these projects at the earliest. PP was also informed about the OM of MoEF dated 22/03/2010 in context to the validity of issued TORs'.
2. Applications submitted by the applicant were in old formats and were not filled in completely. Thus PP was asked to submit completely filled applications in revised format.
3. Project Proponents did not come prepared with presentations and other relevant documents so as understand the locations of various quarries and the salient

features of each of these quarries.

4. Committee also suggested the PP to create an Environment Cell so that data collection and EIA studies of all the sites of sand quarries may be taken up.

Finally the committee decided to call the PP only after submission of completely filled applications in revised format in the subsequent meetings.

24. Case No. 541/2010 – M/s Maihar Cement (A Div of Century Textile & Industries Ltd) Maihar Cement Complex, Sarla Nagar, Maihar Distt Satna 485772 (M.P) Captive Thermal Power Plant- Expansion of capacity from 35 MW to 85 MW at M/s Maihar Cement (A Div of Century Textile & Industries Ltd) Maihar Cement Complex, Sarla Nagar, Maihar Distt Satna 485772 (M.P) For ToR

This being a Thermal Power Plant with production capacity of < 500 MW (based on coal) is listed at S.N. 1(d) of schedule under 'B' Category of EIA Notification, 2006 and is to be appraised by SEAC.

The applicant, presented the salient features of the project. Information pertaining to the above project was examined by the committee. After discussion on the project it was revealed that:

This is a case of production of power to the tune of 50.0 MW at existing Cement Plant. Industry has planned to generate power for captive use from coal. The site is located in Maihar Cement Complex, Sarla Nagar, Maihar Distt Satna. Submissions and the presentation made by the PP and his Consultant reveals following information on the project:

Production Capacity	50 MW
Project cost	Rs 25000 Lac
Fuel	Coal – 866 TPD
Water Req	700 KLD
Source of Water	Mine pit water
Stack height	86 meters
Ash generation	364 TPD- 100 % shall be used in-house in cement industry.

Committee has agreed to issue TOR to the PP to carry out EIA /EMP, with inclusion of following:

1. Micro-level features shall be depicted on to-the-scale map and presented with the EIA.
2. Lay out map showing the details of surrounding features has to be furnished.
3. Compliance of Air & Water Consent conditions and Environmental Clearance (issued for the operational cement unit and mines) has to be furnished with the EIA.
4. Extra efforts for Conservation of water have to be proposed in EIA.
5. Intent of CDM where ever possible (such as waste heat recovery) has to be taken up.
6. As per Gazette Notification dated 19/09/97 the coal based thermal power plants located in urban / sensitive area shall use beneficiated coal with ash content not exceeding 34 %, if by any chance the proposed unit falls under the above category the proposal has to be revised accordingly.
7. Mode of transport of coal up to the industry along with the route to be furnished.
8. Ambient Air Quality monitoring has to be carried out in accordance to the notification dated 16/11/09.
9. NOC from local authority (Maihar) to be furnished.
10. All chemical analyses report from approved laboratory in original format. The chemical analyses should incorporate method of analyses, instruments used and the details of standards used. The date and time of sampling should also be mentioned in the report.
11. Monitoring has to taken up as per the norms using appropriate air/water quality modeling, based on meteorological data (wind-rose) of the region.
12. Plantation in at least 33% of the total area has to be ensured; accordingly plan has to be submitted with EIA.
13. Calculations for the oxygen likely to be consumed per second / month / hour in the industrial operations viv-a-vis oxygen likely to be produced by the proposed plantation has to be furnished in the EIA so as to justify the proposed plantation in the premises.
14. Any litigation pending against the industry should be addressed appropriately.
15. Use of Solar energy for utilities has to be explored and implemented.
16. The EIA should be prepared based on model TOR for appraisal of power projects issued by MoEF, Delhi.

25. Case No. 542/2010 M/s SVC Resources Ltd., Navbharat, Udhog Bhawan, 2nd Floor, Ring Road No.-1, Telibhandha-P.O. Ravigram, Distt.-Raipur (C.G.) Iron Ore beneficiation Plant at Village-Dhamki, Tehsil-Sihora, Distt.-Jabalpur (M.P.) For ToR.

Mineral beneficiation projects with capacity < 0.1 million ton/annum mineral throughput are listed at SN 2 (b) Column B of the Schedule of EIA Notification hence these are required to be appraised by the SEAC. The proposed project pertains to beneficiation of iron ore at village Dhamki, Tehsil- Sihora & District – Jabalpur (M.P). The capacity is 90,000 TPA. Water requirement is reported to be 2.0 m³ / Hour which shall be re-cycled the make-up water requirement will be 16m³ / day, which shall be obtained from the nearby mining pits. No forest is reported in the 10 Km radius. Total area available with the proposed industry is 1.92 Ha and the plant shall be established in 2000 m². The unit is registered in DIC. After deliberations committee has decided to issue TOR for carrying out EIA / EMP with inclusion of following points:

1. Micro-level features shall be depicted on to-the-scale map and presented with the EIA.
2. Lay out map showing the details of surrounding features has to be furnished.
3. Extra efforts for Conservation of water have to be proposed in EIA.
4. Mode of transport of materials to the industry along with the route to be furnished.
5. Ambient Air Quality monitoring has to be carried out in accordance to the notification dated 16/11/09.
6. All sorts of wastes (liquid & solid) have to be addressed in detail with respect to their chemistry, storage, disposal and transportation.
7. NOC from Gram Panchayat to be furnished.
8. NOC from forest department stating distance from the nearest forest, wild-life Sanctuary and other sensitive features.
9. All chemical analyses report from EPA approved laboratory in original format. The chemical analyses should incorporate method of analyses, instruments

used and the details of standards used. The date and time of sampling should also be mentioned in the report.

10. Monitoring has to taken up as per the norms using appropriate air/water quality modeling, based on meteorological data (wind-rose) of the region.
11. Plantation in at least 33% of the total area has to be ensured; accordingly plan has to be submitted with EIA.
12. Any litigation pending against the industry should be addressed appropriately.
13. Use of Solar energy for utilities has to be explored and implemented.
14. The EIA should be prepared based on model TOR for appraisal of such projects issued by MoEF, Delhi.

26. Case No. 265/2009 M/s Pacific Exports, 11, Dunn Market Bargawan Katni (M.P.) Expansion Case - Jhilti Iron ore, Blue Dust & laterite Mine at village - Jhilti, Tehsil- Sihora Distt- Jabalpur (M.P) Area- 27.05 Ha (Cap- 8000 Tonnes/Year to 80640 TPA) Revised For ToR - TOR issued vide letter no. 236 dt. 09/04/09

This being a mining project with lease area between 50 ha to 5 ha is listed at S.N. 1(a) of schedule under 'B' Category of EIA Notification, 2006 and is to be appraised by SEAC. This is a case submitted for revised TOR in view of enhanced production capacity. Earlier TOR was issued vide letter dated 09/04/09. The applicant presented the salient features of the project. After deliberations committee has decided to issue revised TOR to the PP, with inclusion of following additional points:

1. Ambient Air Quality monitoring has to be carried out in accordance to the notification dated 16/11/09.
2. Use of Solar energy for utilities has to be explored and implemented.
3. All chemical analyses report from EPA approved laboratory in original format. The chemical analyses should incorporate method of analyses, instruments used and the details of standards used. The date and time of sampling should also be mentioned in the report.
4. Mode of transport of materials to & from the site along with the route to be furnished.
5. Micro-level features shall be depicted on to-the-scale map and presented with the EIA.
6. Other points as mentioned in earlier TOR have to be taken in to

Enclosure to the Minutes of 54th Meeting dated 28/04/2010 [Other issues point No. 9 at page 21]

Case no. 494/2009 - Chirayu Hospital 6, Malipura Pirgate, Bhopal (M.P) Building Construction - the Proposed site earmarked for development of Hospital and Medical College at Bhaikhedi Indore Road Bhopal (M.P)

Dr. Ajay Goenka, Secretary, Chirayu Charitable Foundation was present in person in the SEAC meeting held on 28/04/2010. During the presentation Dr Goenka assured the Committee to take timely and appropriate action on the following issues:

1. Hospital being a sensitive building, its structures shall be designed/ built according to the design parameters recommended by NBO for the buildings falling in seismic zone-II, to prevent it from the possible impacts due to earth-quakes.
2. A new STP shall be constructed towards eastern boundary of the site along with the construction of residential accommodation.
3. The existing structure for the ETP shall be dismantled and the new ETP will be constructed as per revised details and at least 9.0 m away from the boundary wall along the nallah.
4. The RCC boundary wall with adequate depth below ground level shall be constructed all along the nallah and with HDPE lining to prevent seepage. Depth of the boundary wall will be kept such that no effluent from the premises / ETP is percolated in to the nallah.
5. Characteristics of the raw and treated liquid waste from hospital activities have to be monitored regularly along with the measurement of Total Organic Carbon (TOC).
6. Commitment for developing and maintaining the green belt in 7.5 acres in compliance to the Notification of M.P. Govt. dated 30/01/2009 has to be fulfilled and no other activity shall be permitted in this area.
7. Provision of covered space enough to store BMW generated in two days and another covered storage for manure shall be provided in the premises as per provision.
8. Rain water collection pits will be provided with oil/grease and silt trap to ensure safe and uncontaminated rain water for harvesting. The PP will ensure that no contaminated water is used for recharge. Regular monitoring of this water has to be conducted and reported to the authorities.
9. Eight meters wide green belt should be created on other three boundaries (in addition to point 5) of the premises even if the total green area exceeds 33% of the total plot area.
