#### B. Corrigendum

**25. Case No. 2116/2014** - Prior Environmental Clearance for **Stone Quarry** (Opencast Manual/ Semi Mechanized Method) in an area of 2.80 ha. for production capacity of 1,50,000 cum/year (as per SEAC recommendation) at Khasra no. 74 at Village - Dabri Ray, Tehsil - Punasa, District - Khandwa (M.P) by Shri Uttam Pal Singh S/o Shri K. Giridhar Naidu, Village-Purni, Tehsil-Punasa, District-Khandwa (M.P) - 450114.

1. Prior Environmental Clearance for the project was granted in 216<sup>th</sup> SEIAA meeting dtd. 07.07.2015. Due to typological mistake the average depth of the pit has been mentioned as 6 m. in specific condition No. (ii).
  2. Review of the records reveals that SEAC in its 185<sup>th</sup> meeting dtd. 29.04.2015 has recommended 20 m. depth of the pits and it is 21 m. as per the mining plan approved by competent authority.
- Considering above facts, the authority decided that now specific condition No. (ii) shall be read as "**The average depth of the pit shall not exceed 20 m. at the end of lease period**" in place of "The average depth of the pit shall not exceed 6.0m at the end of lease period".
  - It was also decided that .....

*Since the depth of the pit is 20m, provision of Mines Act 1952 shall be invoked, PP should obtain the NOC from the DG of Mine Safety before commencing any mining activity on the site.*

EC letter shall be issued accordingly.

*Meeting ended with a vote of thanks to the Chair.*
