1. **Case No.- 5292/2016** Rayaz Khan R/o Village – Sagor, Tehsil & Distt. Dhar (M.P.) (SIA/MP/MIN/5319/16) Prior Environment Clearance for Crusher Stone Deposit in an area of 2.00 ha. (14250 cum/year) at Khasra No. 753 at Village-Kheda, Tehsil - Dhar, Dist. Dhar (MP)

The case was discussed and recommended in 47th SEAC-II meeting dtd. 27.08.2016 and it was reported that :-

".....SEIAA vide letter no. 3173/SEIAA/16 dated 16/08/2016 and 3240/SEIAA/16 dated 26/08/2016 has also instructed to appraise cases on priority as per GOI, MoEF&CC notification dated 01/07/2016 and thus committee decided that as per the above instructions of SEIAA, all

such cases should be appraised on the priority on the basis the lease documents available in the file/representation submitted by the PP.

In the GOI, MoEF&CC notification dated 01/07/2016 it is stated that "A cluster shall be formed when the distance between the peripheries of one lease is < than 500 meter from the periphery of other lease in a homogeneous mineral area which shall be applicable to the mine leases or query license granted on and after 09/09/2013".

The case was scheduled for discussion on above grounds. Committee on perusal of file and documents observed that this lease was sanctioned vide order no. 1116 dated 21/08/2016 which is prior to the 09/09/2013 and thus does not falls under the pervue of cluster approach as per GOI, MoEF&CC notification dated 01/07/2016. The committee after deliberations decided that since the lease of mine is 5.00 ha and being the case in now treated as non-cluster as per GOI, MoEF&CC notification dated 01/07/2016, the case may be transferred to DEIAA through SEIAA as per GOI, MoEF&CC notification dated 15/01/2016."

From the perusal of the documents in this particular case and the above observation of SEAC, there are 8 other mines within 500 m. radius (as per the report of Mining Officer Dhar) having a combined area of 21.0 ha. (including the above mine). As per the instructions issued by the Department of Environment, GoMP on 06.09.2016, it has been decided to close this case in SEIAA and to be appraised in DEIAA, Dhar with the following instructions :-

1. The case should be processed/appraised as per the guidelines issued in notifications of 15.01.2016 and 01.07.2016.
2. A petition (OA 404/2016) has been filed before the Hon'ble NGT (Principal Bench) New Delhi where MP-SEIAA is one of the respondent. Any decision by the Hon'ble NGT shall be binding to DEIAA as well as the PP. While issuing the conditions of granting EC, it is mandatory to include this para.
3. Even if the PP has applied in DEIAA afresh, the comments/conditions specified by SEIAA/SEAC should be accounted for while taking a final decision.
4. Although the mining leases granted before 09.09.2013 will be treated as individual cases of B2 category and it will not attract provision relating to cluster situation, however it will be prudent to appraise these cases with environmental related impacts preferably a comprehensive environmental management plan. It should be made mandatory to be a part of the Approved Mine Plan.
5. Normally the PP establish a crusher on the mining lease area, they should follow the norms to be prescribed by MPPCB.
6. While appraising cases of minor minerals, MMR 1959 (amended 2013) should be strictly followed.
7. Mining activities clubbed with industrial activity concentration that to in close proximity of urban agglomeration shall create heavy pollution load which would be detrimental to human health. While appraising this possibility should be remedied by counter measures like thick plantation in and around the mining cluster through CSR funds. The old and abandoned mines should be used for storing water to be used for up-keep of plantation.

8. Care should be taken to keep safe distance of mining activity from the highway and plant trees as many as possible on both sides of the highway.
9. No mining activity should be permitted in the nalla portion/discharge zone.
10. Proper transport routes should be identified which should not pass through the human habitation areas. Preferably pakka roads be constructed from the CSR funds to transport the material. This would deter air pollution.
11. Proper air and water monitoring should be carried out in the mining zone in consultation with MPPCB.
12. Overburden dumps should be properly stored and stabilized in proper scientific manner.
13. Only controlled blasting should be permitted.

It has also been decided to transfer the case file to DEIAA Dhar for onward action. Copy to PP and all concerned.
