This case was recommended in 355th SEAC meeting dated 29.03.2019 and it was recorded that.....

".....During presentation it was observed by the committee as per the Google image based on the co-ordinates provided by PP that a stream is crossing the lease and on this stream two stop dams are constructed out of which one stop dam is within the lease and another on the north side at a distance of approx. 06 meters. The shape of lease is also not matching with the given co-ordinates in PFR. Committee discussed the issue because as per MMR, 1996 minimum 100 meters area is to be left from any stop dam / water body and if the same is applied on this lease leaving mandatory 100 meters area as safety, no mining area will be available for mining in this lease. Thus committee after deliberations recommends that on above grounds this case cannot be considered for grant of EC..."
