Earlier Standard On -line ToR was issued by SEAC through Parivesh Portal.

The case presented by the Env. Consultant Shri Umesh Mishra M/s Creative Enviro Services , Bhopal and PP's authorized representative Shri Robin Agrawal on dated 21.02.2025 .

During Presentation PP submitted that -

- The subject lease was granted to M/s Vinod Agrawal and proposed for capacity expansion for Dolomite mining . The proposed project is an opencast and fully mechanized mining project, where mining of Dolomite will be done through drilling, blasting/ rock breaker , Jack hamer etc .
- The lease was granted in year from 1997 and it is valid to 2052. It was in operational since 1997 .
- The environment clearance was obtained previously 193/SEIAA/18 Dated 04.05.2018 and
- Certified compliance report from RO MoEF&CC was issued vide no 18-B 239/2024 (DSEAC) dated 04.10.2024.
- No tree felling or cutting is proposed for the subject proposal .
- 1 garland drain and one settling tank has already been provided for existing operation .
- Presently 1.0184 hect of land is excavated which will be increased to 3.1632 hect till conceptual period.
- As per land use plan, 1.0472 hect of area shall be converted into water body.

- At the same time total 0.05 hectare area will be converted as green belt with 4000 number of plants inclusive of existing 100 number.

After deliberations the EIA/EMP and other submissions made by the PP earlier were found to be satisfactory and acceptable, hence committee decided to recommend **the case for grant of prior EC for capacity expansion in excavation of Dolomite Deposit from (66479 TPA to 125289 TPA)) (ROM – 156503 TPA (Dolomite – 125289 TPA, Mine waste – 6962 TPA, Soil- 24252 TPA) (Area: 5.11 ha.) (A) MINING OPERATIONAL PHASE

- Muffle with NONEL system for Blasting shall be adopted for proposed mining and no secondary blasting shall be done. Rock breaker shall be used wherever required
- Working height of the loading machines shall be compatible with bench configuration.
- Slurry Mixed Explosive (SME) shall be preferred in comparison of solid cartridge.
- No explosive will be stored at the mine site.
- No dump shall be stacked outside the lease area.
- Mechanized sprinklers shall be provided in mine.
- Curtaining of site shall be done through thick plantation all around the boundaries of all part of lease. The proposed plantation scheme should be carried out along with the mining and PP would maintain the plants for five years including casualty replacement. Initially, dense plantation shall be developed along the site boundary (in three rows) to provide additional protection.
- Peripheral plantation all around the project boundary shall be carried out using tall saplings of minimum 2 meters height of species which are fast growing with thick canopy cover preferably of perennial green nature. As proposed in the landscape plan & EMP a minimum of 4000 trees shall be planted on barrier zone, backfilled area, and along the road also.

प्रकरण में SEACकी 762वीं बैठक दिनांक 03/06/2024 में की गई अनुशंसा उपरांत राज्य स्तरीय पर्यावरण समाघात निर्धारण प्राधिकरण की 860वीं बैठक दिनांक 06/06/2024 में निम्नानुसार निर्णय लिया गया :-

दिनांक 28/05/2024 को जनसुनवाई संपन्न की गई।

1. माननीय विधायक श्री गौरव सिंह पारधि जी कंसल्टेंट के द्वारा किए गए सर्वे के अनुसार नदी का पानी पीने योग्य नहीं है। पानी का उपयोग डोमेस्टिक उपयोग के लिए नहीं है। इस खदान में रेत नहीं है। जहां पर माईनिंग करते हैं वहां पर पर्यावरण का बहुत गहरा इफेक्ट पडने वाला है। जमीन का पानी खारापन है। पीने लायक नहीं है। BOD के कंटेन्ट ज्यादा है आज तक किसी भी खदान में स्वीकृत राशि प्रदान नहीं की। पूर्व खदानों में स्वीकृत राशि प्रदान नहीं की गई, ना ही स्थानीय लोगों को रोजगार प्रदान किया गया। चंदन नदी छोटी नदी है, इसका स्लोप नहीं है। नई रेत नहीं आती। जब तक रेत है तब तक नदी है, नहीं तो नाला बन जाएगा। रेत निकालने से ग्राउंडवाटर एकदम नीचे चला गया। नल, ट्यूबवेल से पानी खत्म है। पर्यावरण से क्षति हुई है। नदिया नहीं होगी तो पलायन करना होगा। आपका माईनिंग प्लान पूर्णतः गलत है।
2. विधायक महोदय विक्की पटेल जी पर्यावरण में दी गई स्वीकृति में किसी भी नियमों का पालन नहीं किया गया। अवैध खनन पर कार्यवाही करें, रेत समाप्त हो गई खदान में। माईनिंग विभाग द्वारा कोई कार्यवाही नहीं की गई। क्षेत्र का पर्यावरण संतुलन न बिगाड़े, खदान को स्वीकृति प्रदान न की जाए। स्थानीय रोजगार प्राप्त नहीं हो रहा। बाहर के लोग रेत निकाल रहे हैं। 20 मीटर रेत निकाल ली गई। बोरवेल का पानी 500 मीटर तक नहीं है। कृषकों के साथ अन्याय नहीं होने देंगे, खदान स्वीकृत नहीं होना चाहिए। न सीमांकन हुआ ना मुनारे लगे। कृपया सहयोग प्रदान करें। माईनिंग विभाग की मॉनिटरिंग नहीं की जाती। धडल्ले से रेत चोरी हो रही है ग्राम पंचायत की NOC कितने वर्षों के लिए भेजी जाती है, ग्रामवासियों को रेत नहीं दी जाती।

उपरोक्त के दृष्टिगत उक्त प्रकरण में जनसुनवाई में उठायें गये मुद्दों के निराकरण हेतु म. प्र. स्टेट माईनिंग कॉर्पोरेशन के सक्षम प्राधिकारी द्वारा अनुपालन प्रतिबद्धता का समावेश कर अनुशंसा सहित प्राधिकरण को प्रेषित किये जाने हेतु प्रकरण **SEAC** को अग्रेषित किया जाये।

The case presented by the Env. Consultant Shri Rudraksh Agarwal, MITCON Consultancy and Engineering Services Ltd., Pune (Maharashtra) and authorized representative of PP Shri Alok Kumar Choubey , EE for ascertain scope of EIA study.

Committee after deliberations recommended to issue standard TOR prescribed by the MoEF&CC for conducting the EIA along with following additional TOR's:-

1. Conservation of river course along with its tributaries,
2. Catchment area protection measures at large,
3. To control possible water logging in the area.
4. Explore possibilities to provide water during kharif season.
5. To educate farmers for proper utilization of water and adopt crop patterns to maintain overall ecological balance.
6. To avoid cutting of trees, adopt practicing shifting of trees as far as possible.
7. Study of fossil /bio-sphere zone in Gandhwani and Maheshwar.
8. Since project involves 30.0 ha. Forest area, F.C. clearance has to be obtained by PP and copy of the same should be submitted with EIA report.
9. Bifurcation of RF and PF details (if any).
10. Status of land as per land recored register of concerned collector.
11. CAT plan shall be prepared and the same shall be approved by the concerned DFO.

12. KML of FC clearance and EC clearance shall be submitted with EIA report with forest compartment history as per current forest plan.
13. Thematic diagram showing channel from water lifting point to the distribution area shall be submitted with EIA report.
14. Details of actual area occupied by pipes and other other area (such as for movement of trucks and logistic support) shall be calculated and discussed in the EIA report.
15. It shall also be verified if any area is falling under PESA Act, 1996, if yes their provisions shall accordingly be complied.
16. Tectonics, seismicity and history of past earthquakes in the area. A site specific study of the earthquake parameters will be done. The results of the site specific earthquake design shall be sent for approval of the NCSDP (National committee of Seismic Design Parameters, Central water commission, New Delhi for large dams.
17. If any issue involved to R&R, shall be elaborated in EIA with proper provisions issued by various State /central Government orders/ notification. In case of R&R is proposed then list of all the Project Affected Families (PAFs) with their name, age, educational qualification, family size, sex, religion, caste, sources of income, land & house holdings, other properties, occupation, source of income, house/land to be acquired for the project and house/land left with the family, any other property, possession of cattle, type of house etc.
18. Resettlement and Rehabilitation Plan needed to be prepared on the basis of findings of the socio- economic survey coupled with the outcome of public consultation held. The R&R package shall be prepared after consultation with the representatives of the project affected families and the State Government. Detailed budgetary estimates are to be provided. Resettlements site should be identified. The plan will also incorporate community development strategies.
19. Special attention has to be given to vulnerable groups like women, aged persons etc. and to any ethnic/indigenous groups that are getting affected by the project.
20. Impacts of blasting activity during project construction which generally destabilize the land mass and leads to landslides, damage to properties and drying up of natural springs and cause noise pollution will be studied. Proper record shall be maintained of the baseline information in the post project period.
21. All muck disposal sites should be minimum 30 m away from the HFL of river. The quantity of muck to be generated and the quantity of muck proposed to be utilized shall be calculated in consultation with the project authorities. Details of each dumping site viz. area, capacity, total quantity of muck that can be dumped etc. should be worked out and discussed in the plan. Plan for rehabilitation of muck disposal sites should also be given. The L-section / cross section of muck disposal

- sites and approach roads should be given. The plan shall have physical and financial details of the measures proposed. Layout map showing the dumping sites vis-à-vis other project components will be prepared and appended in the chapter.
22. A detail of the source (quantum of water available, other potential users etc.) from where water is envisaged to be lifted shall be furnished.
 23. Places where diversions of nallah/natural drains are proposed should be detailed out in the EIA report.
 24. Sedimentation study in the pipe lines including the deposition, scaling etc should be furnished with EIA report along with the methodology proposed for its cleaning.
 25. Economic viability and cost benefit analysis be conducted and presented in the EIA report and should also take into consideration environmental/ecological factors.
 26. How micro-irrigation technology shall be implemented in this project after the completion of the project should be discussed in the EIA report.
 27. The study area for the EIA shall include 2.5 Km area on either sides of the pipeline.
 28. Management plan for dug-out material generated during laying / construction of the pipe line / structures.
 29. An inventory of various features such as sensitive area, fragile areas, mining / industrial areas, habitation, water-bodies, major roads, etc. shall be prepared and furnished with EIA.
 30. Muck management plan wrt mechnary deployment and movement of trucks shall be discussd in the EIA report.
 31. An inventory of flora & fauna based on actual ground survey shall be presented and assessment of ecological services and damage with respect to flora & fauna air, water, land and other environmental attributes shall be studied and reported in EIA report.
 32. PP should also explore the possibility of reducing proposed power requirement and methods proposed for dealing with back pressure in case of electricity failure should be studied in the EIA report.
 33. EIA report should cover impact of anticipated change in cropping pattern and associated activities like horticulture, animal husbandry etc.
 34. PP should carry out the public hearing of the site as per the procedure laid down in the EIA Notification, 2006.

The case presented by the Env. Consultant Shri R. S. Bhatiya, M/s R. S. Envirolinks Technologies Pvt. Ltd., Gurugram. and authorized representative of PP for ascertain scope of EIA study.

Committee after deliberations recommended to issue standard TOR prescribed by the MoEF&CC for conducting the EIA along with following additional TOR's:-

1. Conservation of river course along with its tributaries,
2. Catchment area protection measures at large,
3. To control possible water logging in the area.
4. Explore possibilities to provide water during kharif season.
5. To educate farmers for proper utilization of water and adopt crop patterns to maintain overall ecological balance.
6. To avoid cutting of trees, adopt practicing shifting of trees as far as possible.

7. Since project involves 32.0ha., forest area, F.C. clearance has to be obtained by PP and copy of the same should be submitted with EIA report.
8. Bifurcation of RF and PF details (if any).
9. Status of land as per land recored register of concerned collector.
10. CAT plan shall be prepared and the same shall be approved by the concerned DFO.
11. KML of FC clearance and EC clearance shall be submitted with EIA report with forest compartment history as per current forest plan.
12. Thematic disgram showing channel from water lifting point to the distribution area shall be submitted with EIA report.
13. Details of actual area occupied by pipes and other other area (such as for movement of trucks and logistic support) shall be calculated and discussd in the EIA report.
14. It shall also be verified if any area is falling under PESA Act, 1996, if yes their provisions shall accordingly be complied.
15. Tectonics, seismicity and history of past earthquakes in the area. A site specific study of the earthquake parameters will be done. The results of the site specific earthquake design shall be sent for approval of the NCSDP (National committee of Seismic Design Parameters, Central water commission, New Delhi for large dams.
16. If any issue involved to R&R, shall be elaborated in EIA with proper provisions issued by various State /central Government orders/ notification. In case of R&R is proposed then list of all the Project Affected Families (PAFs) with their name, age, educational qualification, family size, sex, religion, caste, sources of income, land & house holdings, other properties, occupation, source of income, house/land to be acquired for the project and house/land left with the family, any other property, possession of cattle, type of house etc.
17. Resettlement and Rehabilitation Plan needed to be prepared on the basis of findings of the socio- economic survey coupled with the outcome of public consultation held. The R&R package shall be prepared after consultation with the representatives of the project affected families and the State Government. Detailed budgetary estimates are to be provided. Resettlements site should be identified. The plan will also incorporate community development strategies.
18. Special attention has to be given to vulnerable groups like women, aged persons etc. and to any ethnic/indigenous groups that are getting affected by the project.
19. Impacts of blasting activity during project construction which generally destabilize the land mass and leads to landslides, damage to properties and drying up of natural springs and cause noise population will be studies. Proper record shall be maintained of the baseline information in the post project period.
20. All muck disposal sites should be minimum 30 m away from the HFL of river.

The quantity of muck to be generated and the quantity of muck proposed to be utilized shall be calculated in consultation with the project authorities. Details of each dumping site viz. area, capacity, total quantity of muck that can be dumped etc. should be worked out and discussed in the plan. Plan for rehabilitation of muck disposal sites should also be given. The L-section / cross section of muck disposal sites and approach roads should be given. The plan shall have physical and financial details of the measures proposed. Layout map showing the dumping sites vis-à-vis other project components will be prepared and appended in the chapter.

21. A detail of the source (quantum of water available, other potential users etc.) from where water is envisaged to be lifted shall be furnished.
22. Places where diversions of nallah/natural drains are proposed should be detailed out in the EIA report.
23. Sedimentation study in the pipe lines including the deposition, scaling etc should be furnished with EIA report along with the methodology proposed for its cleaning.
24. Economic viability and cost benefit analysis be conducted and presented in the EIA report and should also take into consideration environmental/ecological factors.
25. How micro-irrigation technology shall be implemented in this project after the completion of the project should be discussed in the EIA report.
26. The study area for the EIA shall include 2.5 Km area on either sides of the pipeline.
27. Management plan for dug-out material generated during laying / construction of the pipe line / structures.
28. An inventory of various features such as sensitive area, fragile areas, mining / industrial areas, habitation, water-bodies, major roads, etc. shall be prepared and furnished with EIA.
29. Muck management plan wrt machinery deployment and movement of trucks shall be discussed in the EIA report.
30. An inventory of flora & fauna based on actual ground survey shall be presented and assessment of ecological services and damage with respect to flora & fauna air, water, land and other environmental attributes shall be studied and reported in EIA report.
31. PP should also explore the possibility of reducing proposed power requirement and methods proposed for dealing with back pressure in case of electricity failure should be studied in the EIA report.
32. EIA report should cover impact of anticipated change in cropping pattern and associated activities like horticulture, animal husbandry etc.
33. PP should carry out the public hearing of the site as per the procedure laid down in the EIA Notification, 2006.

35. PP should carry out the public hearing of the site as per the procedure laid down in the EIA Notification, 2006.

Following standard conditions shall be applicable for the mining projects of minor mineral in addition to the specific conditions and cases appraised for grant of TOR:

Annexure- 'A'

Standard conditions applicable to Stone/Murrum and Soil quarries:

1. Mining should be carried out as per the submitted land use plan and approved mine plan. The regulations of danger zone (500 meters) prescribed by Directorate General of Mines safety shall also be complied compulsorily and necessary measures should be taken to minimize the impact on environment.
2. The lease boundary should be clearly demarcated at site with the given co-ordinates by pillars and fenced from all around the site. Necessary safety signage & caution boards shall be displayed at mine site.
3. Arrangements for overhead sprinklers with solar pumps / water tankers should be provided for dust suppression at the exit of the lease area and fixed types sprinklers on the evacuation road. PP should maintain a log book wherein daily details of water sprinkling and vehicle movement are recorded along with annual record of water consumed in sprinkling during Summer (February to May/June) and winter session (October to January) separately.
4. Transportation of material shall only be done in covered & PUC certified vehicles with required moisture to avoid fugitive emissions. Transportation of minerals shall not be carried out through forest area without permissions from the competent authority.
5. Mineral evacuation road shall be made pucca (WBM/black top) by PP.
6. Necessary consents shall be obtained from MPPCB and the air/water pollution control measures have to be installed as per the recommendation of MPPCB.
7. Crusher with inbuilt APCD & water sprinkling system shall be installed minimum 100 meters away from the road and 500 meters away from the habitations only after the permissions of MP Pollution Control Board with atleast 04 meters high wind breaking wall of suitable material to avoid fugitive emissions.
8. Working height of the loading machines shall be compatible with bench configuration.
9. Slurry Mixed Explosive (SME) shall be used instead of solid cartridge.
10. The OB shall be reutilized for maintenance of road. PP shall bound to compliance the final closure plan as approved by the IBM.
11. Appropriate activities shall be taken up for social up-liftment of the area. Funds reserved towards the same shall be utilized through Gram Panchayat/competent authority.
12. Six monthly occupational health surveys of workers for Cardio-vascular & Pulmonary health, vital parameters as prescribed by concerned regulatory authority shall be carryout and all the workers shall be provided with necessary PPE's. Mandatory facilities such as Rest Shelters, First Aid, Proper Fire Fighting Equipments and Toilets (separate for male & female) shall also be provided for all the mine workers and other staff. Mine's site office, rest shelters etc shall be illuminated and ventilated through solar lights.
13. A separate bank account should be maintained for all the expenses made in the EMP and CER activities by PP for financial accountability and these details should be provided in Annual Environmental Statement. In case the allocated EMP budget for mitigative measures to control the pollution is not utilized fully, the reason of under utilization of budgetary provisions for EMP should be addressed in annual return.
14. To avoid vibration, no overcharging shall be carried out during blasting and muffle blasting shall be adopted. Blasting shall be carried out through certified blaster only and no explosive will be stored at mine site without permission from the competent authority.

15. Mine water should not be discharged from the lease and be used for sprinkling & plantations. For surface runoff and storm water garland drains and settling tanks (SS pattern) of suitable sizes shall be provided.
16. All garland drains shall be connected to settling tanks through settling pits and settled water shall be used for dust suppression, green belt development and beneficiation plant. Regular de-silting of drains and pits should be carried out.
17. PP shall be responsible for discrepancy (if any) in the submissions made by the PP to SEAC & SEIAA.
18. The amount towards reclamation of the pit and land in MLA shall be carried out through the mining department. The appropriate amount as estimated for the activity by mining department has to be deposited with the Collector to take up the activity after the mine is exhausted.
19. NOC of Gram Panchayat should be obtained for the water requirement and forest department before uprooting any trees in the lease area. PP shall take Socio-economic activities in the region through the 'Gram Panchayat'.
20. The leases which are falling <250 meters of the forest area and PP has obtained approval for the Divisional Level Commissioner committee, all the conditions stipulated by Divisional Level Commissioner committee shall be fulfilled by the PP.
21. The validity of the EC shall be as per the provisions of EIA Notification subject to the following: Expansion or modernization in the project, entailing capacity addition with change in process and or technology and any change in product - mix in proposed mining unit shall require a fresh Environment Clearance.
22. If it being a case of Temporary Permit (TP), the validity of EC should be only up to the validity of TP and PP has to ensure the execution of closure plan.
23. All the mines where production is > 50,000 cum/year, PP shall develop its own website to display various mining related activities proposed in EMP & CER along with budgetary allocations. All the six monthly progress report shall also be uploads on this website along with MoEF&CC & SEIAA, MP with relevant photographs of various activities such as garland drains, settling tanks, plantation, water sprinkling arrangements, transportation & haul road etc. PP or Mine Manager shall be made responsible for its maintenance & regular updation.
24. All the soil queries, the maximum permitted depth shall not exceed 02 meters below general ground level & other provisions laid down in MoEF&CC OM No. L-11011/47/2011-IA.II(M) dated 24/06/2013.
25. The mining lease holders shall after ceasing mining operation, undertake re-grassing the mining area and any other area which may have been disturbed due to their mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc. Moreover, a separate budget in EMP & CER shall maintained for development and maintenance of grazing land as per the latest O.M, of MoEF&CC issued vide letter F.No. 22-34/2018-IA. III, dated 16/01/2020.
26. The project proponent shall follow the mitigation measures provided in MoEF&CCs Office Memorandum No. Z-11013/57/2014-IA. II (M) dated 29th October 2014, titled "Impact of mining activities on Habitations-issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area".
27. Any change in the correspondence address shall be duly intimated to all the regulatory authority within 30 days of such change.
28. Authorization (if required) under Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 should be obtained by the PP if required.
29. A display board (in hindi) with following details of the project is mandatory at the entry to the mine.
 - a. Lease owner's Name, Contact details etc.
 - b. Mining Lease area of the project (in ha.) with latitude and longitude.
 - c. Length, breadth, sanctioned depth of mine and mining time.
 - d. Sanctioned Production capacity of the project as per EC and Consent of MPPCB.
 - e. Method of mining (Manual/Semi Mechanised) and Blasting or Non-blasting.

- f. Plantation and CER activities.
30. Dense plantation/ wood lot shall be carryout in the 7.5 meters periphery/barrier zone of the lease through concern CCF (social forestry) or concerned DFO or any other suitable agency and on mineral evacuation road & common area in the village through any suitable Govt. agency (such as Van Vikas Nigam / Van Samiti under monitoring and guidance of Forest Range officer with work permission from DFO concerned / Gram Panchayat / Agricultural department or any other suitable agency having adequate expertise as per the budgetary allocations made in the EMP.
 31. Entire plantation proposed in barrier zone of lease area shall be carried out as per submitted plantation scheme and along the fencing seed sowing of Neem, Babool, Safed Castor etc shall also be carried out.
 32. Top soil shall be simultaneously used for the plantation within the lease area and no OB/dump shall be stacked outside the lease area. PP should take-up entire plantation activity within initial three years of mining operations and shall maintain them for entire mine life including casualty replacement. PP should also maintain a log book containing annual details of tree plantation and causality replacement and to take adequate precautions so as not to cause any damage to the flora and fauna during mining operations. PP shall explore the possibility for plantation in adjoining forest land in consultation with concerned DFO and commensurate budget shall be transferred for plantation to DFO.
 33. Local palatable mixture of annual and perennial grass and fodder tree species shall be planted for grassland/fodder development on degraded forest land through forest department or on other community land available for grassland and fodder development through Gram Panchayat in concerned village and handed over to Gram Panchayat after lease period.
 34. Before onset of monsoon season as per submitted plantation scheme fruit bearing species preferably of fodder / native shall be distributed in nearby villagers to promote plantation and shall be procured from social forestry nursery/ Government Horticulture nursery. This activity shall be carried out under Govt. of Madhya Pradesh "ANKUR YOJNA" by registering individual villagers on "Vayudoot app". Where ever Aushadhi Vatika (Medicinal Garden) is proposed by PP, a minimum of 50 saplings be planted considering 80% survival with proper protection measures in School or Aganwadi premises.
 35. Adequate provisions of water for irrigating plantation shall be made by PP.
 36. Activities proposed under CER should be based upon outcome of public hearing in category for B-1 projects. However in case of B-2 projects, CER shall be proposed based upon local need assessment and Gram Panchayat Annual Action Plan.
 37. **लीज क्षेत्र के अंदर में केवल केशर / एम-सेंड प्लांट स्थित है, परियोजना प्रस्तावत निम्न शर्तों का पालन करेगा।**
 - खनन क्षेत्र में प्रस्तावित माईन आधारित केशर प्लान्ट/एम.सेड प्लांट हेतु म.प्र. प्रदूषण नियंत्रण बोर्ड से नियमानुसार स्थापना एवं संचालन सम्मति प्राप्त करना होगी।
 - म.प्र. प्रदूषण नियंत्रण बोर्ड की दिशा निर्देशों के अनुसार प्रस्तावित केशर प्लान्ट/एम.सेड प्लांट में स्लरी प्रबंधन तथा वायु प्रदूषणरोधी उपकरणों की स्थापना सुनिश्चित की जावेगी।
 38. **केशर अथवा एम सेंड प्लान्ट प्रस्तावित नहीं है ,परियोजना प्रस्तावत निम्न शर्तों का पालन करेगा।**
 - परियोजना प्रस्तावक के अनुसार लीज क्षेत्र में केशर प्लान्ट/ एम.सेड प्लांट प्रस्तावित नहीं है, अतः लीज क्षेत्र में केशर प्लान्ट/एम.सेड प्लांट स्थापित करने की अनुमति नहीं दी जा सकेगी।
 - खनन क्षेत्र से बाहर प्रस्तावित माईन आधारित केशर प्लान्ट/एम.सेड प्लांट हेतु म.प्र. प्रदूषण नियंत्रण बोर्ड से नियमानुसार स्थापना एवं संचालन सम्मति प्राप्त करना होगी।
 - म.प्र. प्रदूषण नियंत्रण बोर्ड की दिशा निर्देशों के अनुसार प्रस्तावित केशर प्लान्ट/एम.सेड प्लांट में स्लरी प्रबंधन तथा वायु प्रदूषणरोधी उपकरणों की स्थापना सुनिश्चित की जावेगी।
 39. **यदि आवंटित खनन पट्टा भू-स्वामी की सहमति /अनुबंध पर हो तो परियोजना प्रस्तावत निम्न शर्तों का पालन सुनिश्चित करेगा।**
 1. **क्षतिपूर्ति के संबंध में:-**

- म.प्र. भू राजस्व संहिता 1959 की धारा 247 (5) के तहत संबंधित जिला कलेक्टर द्वारा भूमि स्वामियों की क्षतिपूर्ति के निर्धारण हेतु किये गये प्रावधानों/उपबंधों का पालन भूमि स्वामियों को समक्ष में सुनकर भूमि के सतह अधिकार के संबंध में क्षतिपूर्ति का निर्धारण सुनिश्चित किया जाये।
- म.प्र. गौण खनिज नियम, 1996 के नियम 9 (क) एवं नियम, 06(क) के प्रावधान अंतर्गत कण्डिका 04 में किये गये प्रावधानों के अनुरूप सहमति धारक को उत्खनन पट्टा स्वीकृत होने पर, देय रॉयल्टी के 15 प्रतिशत के समतुल्य रकम का सहमति धारक को भुगतान सुनिश्चित किया जाये। उपरोक्त शर्तों का पालन भू-प्रवेश अनुमति के पूर्व सुनिश्चित किया जावे।

Annexure- 'B'

Standard conditions applicable for the Sand Mine Quarries*

1. District Authority should annually record the deposition of sand in the lease area (at an interval of 100 meters for leases 10 ha or > 10.00 ha and at an interval of 50 meters for leases < 10 ha.) before monsoon & in the last week of September and maintain the records in RL (Reduce Level) Measurement Book. Accordingly authority shall allow lease holder to excavate only the replenished quantity of sand in the subsequent year.
2. The lease boundary should be clearly demarcated at site with the given co-ordinates by pillars. Necessary safety signage & caution boards shall be displayed at mine site.
3. Arrangements for overhead sprinklers with solar pumps / water tankers should be provided for dust suppression at the exit of the lease area and fixed types sprinklers on the evacuation road. PP should maintain a log book wherein daily details of water sprinkling and vehicle movement are recorded.
4. Only registered vehicles/tractor trolleys with GPS which are having the necessary registration and permission for the aforesaid purpose under the Motor Vehicle Act and also insurance coverage for the same shall alone be used for said purpose.
5. Transportation of material shall only be done in covered & PUC certified vehicles with required moisture to avoid fugitive emissions. Transportation of minerals shall not be carried out through forest area without permissions from the competent authority.
6. Mineral evacuation road shall be made Pucca (WBM/black top) by PP.
7. Sand and gravel shall not be extracted up to a distance of 1 kilometer (1Km) from major bridges and highways on both sides, or five times (5x) of the span (x) of a bridge/public civil structure (including water intake points) on up-stream side and ten times (10x) the span of such bridge on down-stream side, subjected to a minimum of 250 meters on the upstream side and 500 meters on the downstream side.
8. Mining depth should be restricted to 3 meters or water level, whichever is less and distance from the bank should be 1/4th or river width and should not be less than 7.5 meters. No in-stream mining is allowed. Established water conveyance channels should not be relocated, straightened, or modified.
9. Demarcation of mining area with pillars and geo-referencing should be done prior to the start of mining.
10. PP shall carry out independent environmental audit atleast once in a year by reputed third party entity and report of such audit be placed on public domain such audits be placed on public domain through website developed for public interface along with photographs of work done w.r.t. EMP as well as CER.
11. No Mining shall be carried out during Monsoon season.
12. The mining shall be carried out strictly as per the approved mine plan and in accordance with the Sustainable Sand Mining Management Guidelines, 2016 and Enforcement & Monitoring Guidelines for Sand Mining, 2020 issued by the MoEF&CC ensuring that the annual replenishment of sand in the mining lease area is sufficient to sustain the mining operations at levels prescribed in the mining plan.

STATE EXPERT APPRAISAL COMMITTEE MINUTES OF 21 February, 2025
775th MEETING

13. If the stream is dry, the excavation must not proceed beyond the lowest undisturbed elevation of the stream bottom, which is a function of local hydraulics, hydrology, and geomorphology.
14. After mining is complete, the edge of the pit should be graded to a 2.5:1 slope in the direction of the flow.
15. Necessary consents shall be obtained from MPPCB and the air/water pollution control measures have to be installed as per the recommendation of MPPCB.
16. Appropriate activities shall be taken up for social up-liftment of the area. Funds reserved towards the same shall be utilized through Gram Panchayat/competent authority.
17. Six monthly occupational health surveys of workers shall be carryout and all the workers shall be provided with necessary PPE's. Mandatory facilities such as Rest Shelters, First Aid, Proper Fire Fighting Equipments and Toilets (separate for male & female) shall also be provided for all the mine workers and other staff. Mine's site office, rest shelters etc shall be illuminated and ventilated through solar lights. All these facilities such as rest shelters, site office etc. Shall be removed from site after the expiry of the lease period.
18. A separate budget in EMP & CER shall maintained for development and maintenance of grazing land as per the latest O.M, of MoEF&CC issued vide letter F.No. 22-34/2018-IA. III, dated 16/01/2020 and these details should be provided in Annual Environmental Statement.
19. In case the allocated EMP budget for mitigative measures to control the pollution is not utilized fully, the reason of under utilization of budgetary provisions for EMP should be addressed in annual return.
20. PP shall be responsible for discrepancy (if any) in the submissions made by the PP to SEAC & SEIAA.
